

THE SIEGE OF NOR'KORH, BY FRIGIDMAN

A full scenario for Marathon Infinity. It is a 6 level breach and infiltrate mission into a Pthor military compound, complete with new terminal and chapter arts, as well as some interesting old school mapping tricks and fun bits.

This version of the scenario was updated to Marathon Infinity. If you want to play this scenario in Marathon 2, it is highly recommended you grab the other archive (specifically for M2), or many textures just won't look right on things.

Note: The Historical Readme File has *seriously out of date* contact information. If you want to reach out, find me through my website below.

Enjoy!
