

FRIGIDMAN's INFINITY NET MAP PACK v3

A collection of all my most popular net maps, but tweaked and adjusted for optimum Infinity pleasure.

Just throw this map pack into the folder of Infinity (or some folder within the Infinity folder), and pick it from the Environment Preferences area. It does not have any pre-merged Physics in any of the maps, so you can use your own physics with this.

The Levels:

- Damned if you do...
- Desperate Measures
- Pfhor Winds
- Axiocranium
- Brak Carnage
- Carnage Heights
- Hatala
- Flying Leap
- Cringe
- Cringe Again
- Pfhree Pfhor All

Note: The Historical Readme File has *seriously out of date* contact information. If you want to reach out, find me through my website below.

Enjoy!
